API Documentation

Everything you need to know, in one place

[Support](#) → [API](#) → [Methods](#) → [domains](#) → [getList](#)

IMPORTANT: Our privacy service provider recently changed to WithheldforPrivacy. We want to avoid service interruption for our API users, so please note that in some cases, you may still see Whoisguard in the API parameter names.

namecheap.domains.getList

Returns a list of domains for the particular user

Example Request

1. [https://api.namecheap.com/xml.response?](https://api.namecheap.com/xml.response?ApiUser=apiexample&ApiKey=56b4c87ef4fd49cb96d915c0db68194&UserName=apiexample&Command=domains.getList&Count=100&Offset=0&SortOrder=ASC&SortField=DomainName)

ApiUser=apiexample&ApiKey=56b4c87ef4fd49cb96d915c0db68194&UserName=apiexample&Command=domains.getList&Count=100&Offset=0&SortOrder=ASC&SortField=DomainName

d=namecheap.domains.getList&ClientIp=192.168.1.109

Request Parameters

Global parameters are not shown here (for clarity), but they should be present in *all* requests.

Name	Type	MaxLength	Required?	Description
<i>ListType</i>	String	10	No	Possible values are ALL, EXPIRING, or EXPIRED Default Value: ALL

<i>SortBy</i>	String	50	No	Possible values are NAME, NAME_DESC, EXPIREDATE, EXPIREDATE_DESC, CREATEDATE, CREATEDATE_DESC

Example Response

```

1. <?xml version="1.0" encoding="UTF-8"?>
2. <ApiResponse xmlns="http://api.namecheap.com/xml.response" Status="OK">
3.   <Errors />
4.   <RequestedCommand>namecheap.domains.getList</RequestedCommand>
5.   <CommandResponse Type="namecheap.domains.getList">
6.     <DomainGetListResult>
7.       <Domain ID="127" Name="domain1.com" User="owner" Created="02/15/2016" Expires="02/15/2022"

```

```
IsExpired="false" IsLocked="false" AutoRenew="false" WhoisGuard="ENABLED" IsPremium="true" IsOurDNS="true"/>
8.    <Domain ID="381" Name="domain2.com" User="owner" Created="04/28/2016" Expires="04/28/2023"
     IsExpired="false" IsLocked="false" AutoRenew="true" WhoisGuard="NOTPRESENT" IsPremium="false" IsOurDNS="true"/
     >
9.    <Domain ID="385" Name="domain3.com" User="owner" Created="05/22/2016" Expires="05/22/2023"
     IsExpired="false" IsLocked="false" AutoRenew="true" WhoisGuard="ENABLED" IsPremium="false" IsOurDNS="false"/>
10.   </DomainGetListResult>
11.   <Paging>
12.     <TotalItems>2</TotalItems>
13.     <CurrentPage>1</CurrentPage>
14.     <PageSize>10</PageSize>
15.   </Paging>
16.   </CommandResponse>
17.   <Server>SERVER-NAME</Server>
18.   <GMTTimeDifference>+5</GMTTimeDifference>
19.   <ExecutionTime>0.078</ExecutionTime>
20. </ApiResponse>
```

Response Parameters

Name	Description
ID	Unique integer value that represents the domain
Name	Registered domain name
User	User account under which the domain is registered
Created	Domain creation date
Expires	Domain expiration date
IsExpired	Possible responses: True, False. Indicates whether the domain is expired
IsLocked	Possible responses: True, False. Indicates whether the domain is locked. When Islocked=true, domain changes are not allowed.

Name	Description
AutoRenew	Possible responses: True, False. Indicates whether the domain is set for auto-renew
WhoisGuard	Returns the domain privacy status
IsPremium	Indicates whether the domain name is premium
IsOurDNS	Returns true if Namecheap BasicDNS or Namecheap PremiumDNS are used; if something else, returns false

Error Codes

Specifies the error codes that might be returned from this method

Number	Description
5050169	Unknown exceptions

Bug Report: The input parameter **PageSize** does NOT work, the API for *getList* supports **Pagesize** (lower-case **s**).

Note: *This might seem a minor issue, but it is actively breaking multiple API libraries.*

Hi, may I know whether the API rate limitation has been increased now? As I noticed that there's a comment saying that the rate limitation is 60 requests per minute.

Hello Anson,

Our general API calls restriction is 50/min, 700/hour, and 8000/day across the whole key.

Kind regards,
Namecheap Team

Hello dear support team. Could you explain, what statuses can be in the WhoisGuard field? I feel: ENABLE and NOTPRESENT. Any more?

Thanks a lot!

Hello Dmitry,

The WhoisGuard parameter can have the following statuses in the API response:
"Enabled", "Disabled" and "Notpresent".

Should you have any questions, let us know.

Kind regards,
Namecheap Team

Hello Glen,

It is possible to check the pricing for our products using the [getPricing](#) API command.

If you have any questions, let us know.

Kind regards,
Namecheap Team

Hello. How can I find out the whois verification status via api? (<https://www.namecheap.com/> S...)

In api opensrs and onlinenic I find methods for checking the status and forwarding letters, but you don't.

Hello,

To our regret, we do not support such an API command at the moment.

however, we have forwarded your request to the corresponding department for consideration. However, unfortunately, we do not have information on the further implementation of this feature.

Should we be of any further assistance, please do not hesitate to get in touch!

Kind regards,
Namecheap Team
